CONTROL

SITE S.A.S

will be your ally in the business resources planning and optimization of your business' executive processes, It will permit you to make assertive decisions that will positively impact the growth and performance of your passenger transport system.

SITE Control Masive

It will easily control the accomplishment of your fleet's services generating schedules automatically, optimizing the operation effort by programming only the required vehicles.

SITE Control Collective

If you count with an adequate distribution of your fleet, you will be able to program different routes, avoid vehicle accumulation on a single spot of the route, and supply the transportation demand.

SITE Control Intercity

Be informed of the path followed by the drivers in and outside the city. You will be able to define control zones to conduct closer tracking of the daily operation.

You will know the vehicle's occupancy all the time and reduce the risk of having inspectors at the edge of the highways.

Operations

Establish bidirectional communication all the time with each vehicle of your transportation fleet

Human resources

Manage the different phases of the hiring process, training, and personnel tracking.

Counting

Collect the data of your fleet's mobility and assess the effectiveness of each of your routes.

Maintenance

Manage your company's resources effectively and take advantage of the available spaces to execute your maintenance plan.
